

UC4. Events module

General description

The purpose of events module is to provide employees an overview of various trainings, workshops and other events happening in the company. It will help to better plan the training plan and give employees an opportunity to register on events, where they want to participate.

1. List of all events

Role: Every authenticated user

Business logic

1. The user must be able to see the list of all added events.
2. Following information must be shown regarding every event:
 - a. Event name
 - b. Event start and end date
 - c. Event type
 - d. Manager email
3. By default the events must be sorted by the start date (oldest at the top of the list).
4. The user must be able to apply sorting by the Start date, End date, Event type and Office.
5. The user must be able to search events by name (including partial match).
6. The user must be able to filter events by the Type, Office and Start date.
7. The user must be able to bookmark the event.
8. The user must be able to see all bookmarked events.

2. Event details

Role: Every authenticated user

Business logic

1. The user can access the events details from the list of all events by clicking to the event name.
2. Following data must be shown regarding every event:
 - a. Name
 - b. Description
 - c. Start date
 - d. End date
 - e. Link
 - f. Type
 - g. Office
 - h. Address
3. The empty fields must not be shown in the details view to reduce the space.

Adding and managing events

Role: Administrator

Business logic

1. The administrator must be able to initiate adding of a new event from the list of events by pressing "+" button.
2. To add a new event following fields must be added:
 - a. Name - mandatory text field.
