

UC4. Login to the administration panel

Description

This functionality allows the manager or administrator of the restaurant to log in to the administration panel, where he/she can manage orders, products and other settings.

Roles and permissions

- Administrator

Business logic

- All users must see the "Login as administrator" button at the bottom of the menu.
- The "Login as administrator" button must navigate the user to the authentication page.
 - The user must be automatically redirected to the administration panel if he was previously already logged in.
- The user must enter an Email and Password to access the administration panel.
 - The email field must have a validation - entered value must contain the "@" symbol + contain domain extension (example: @domain.com).
 - If the email is wrong following error message must be shown: "Please enter a valid email."
- If the user entered the Email, that doesn't exist in the system, the following error message must be shown: "The email address could not be found."
- If the wrong password was entered for the existing Email, the following error message must be shown: "Your email or password don't match. Please try again."
- The user must be redirected to the administration panel if the correct email and password were entered.

Credentials for testing
