

## UC5. Viewing and managing orders

### Description

This functionality allows the manager or administrator of the restaurant to see all orders of the restaurant and manage them. The manager can complete or decline the order according to the situation.

### Roles and permissions

- Administrator

### Preconditions

- The user must be successfully authenticated.
- At least one order must be created and submitted to the restaurant.

### Business logic

#### Viewing orders

1. The administrator can navigate to the orders list by clicking the “View orders” button.
2. The administrator must see the list of all orders in status “Open”.
3. The administrator can filter orders by status to see “Completed” and “Declined” orders.
4. The following information must be shown about every order in the list view:
  - a. Table number
  - b. Total number of ordered products
  - c. Order time.
5. The list of orders must be sorted by “Order time”. The newest orders must be at the top of the list.
6. The administrator can click on the order, to see its detailed information. Here the administrator can see all the details provided by the customer in UC3.
7. The administrator must be able to go back to the list of all orders by using “Back” button.

#### Completing and declining orders

1. The administrator must see buttons “Complete” and “Decline” in the order’s detailed information view.
2. The status of the order must change if the administrator clicks one of the buttons.
3. The order must move to the appropriate section in the orders list view.
