UC5. User lists (Internal clubs)

General description

The purpose of User Lists module is to provide employees a possibility to share their interests, hobbies and create various communities over them.

The User Lists module shows all different communities and clubs, that already exists in the company and are created by other employees. The user can rather contact the owner of the List to join it or create a new one if necessary.

1. Seeing all user lists

Role: Every authenticated user

Business logic

- Every employee of the company must be able to see a list of all User Lists under the "User lists" tab in the menu.
- The user must see the list of all User Lists together with the following information about every list:
    - List name;
    - List owner name;
    - List type (Public or Private).
- The user must be able to find more information about the list by clicking on it. Following information must be shown:
    - List name;
    - List owner name;
    - List type (Public or Private).
    - List members (their names).
- The list of User lists must be sorted by the List name field in an alphabetical order.
- The user must be able to search user lists by their names.
- The user must be able to filter user lists by "List type" and "List owner name".

2. Creating a new user list

Role: Every authenticated user

Business logic

- Every authenticated user must be able to initiate adding of the new User List from the "User lists" tab in the menu.
- To create a new "User lists" the following information must be entered:
    - List name - mandatory text field, not longer than 50 symbols.
    - List type - mandatory drop down with options "Public" or "Private".
    - List owner name - must be automatically taken from browser session.
- The user must click button "Save and add" to confirm creation of the new User list.
- The user must see a notification after adding a new user list - "The user list was successfully created" and be redirected back to the page with all User lists.

3. Deleting a user list

Role: Owner of the list

Business logic

- The owner of the list must be able to delete User Lists created by him/her.
- The user must find the User List from the page of all User Lists and open its details view.
- The user must see "Delete" button that will allow initiating the deleting process.
- The user must see the confirmation window before the list will be finally deleted.
- The user must be redirected back to the page with all User lists, after deleting is completed.

4. Adding members to the list

Role: Owner of the list

Business logic

- The owner of the list must be able to add members to the user list from the Directory view.
- In the details view of every person (Directory view) there must be added a button "Add to list".
- By clicking on this button the user must see a list of all User Lists, where he/she is the owner.
- The user must see the button "Add" for every list, where opened user is not added. By clicking on this button the Person must be added to the list.
- The user must see the button "Remove" for every list, where opened user was added previously. By clicking on this button the Person must be removed from the list.
